

Sprint Planning – Import Data using Transform Maps (Spreadsheet)

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An Epic is a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

A Story is a small task. It is part of an Epic.

A Story Point is a number that represents how much effort a story takes to complete, usually using the Fibonacci series.

1 – Very Easy task

2 – Normal task

3 – Moderate task

5 – Difficult task

Story Point Scale – 1, 2, 3, 5

Sprint 1

Employee Data Import – Epic 1

- Preparing Employee Spreadsheet (USN1) – 2
- Loading Spreadsheet into Import Set (USN2) – 3

Data Staging – Epic 2

- Creating Import Set Table (USN3) – 3
- Reviewing Staged Employee Data (USN4) – 2
- Validating Required Fields (USN5) – 3

Total Story Points in Sprint 1

$$2 + 3 + 3 + 2 + 3 = 13$$

Total Story Points in Sprint 1 = 13

Sprint 2

Data Transformation – Epic 3

- Configuring Transform Map (USN6) – 3
- Mapping Source Fields to Target Fields (USN7) – 3

- Running Data Transformation (USN8) – 3
- Handling Transformation Errors (USN9) – 2

Employee Records & Verification – Epic 4

- Creating/Updating Employee Target Records (USN10) – 3
- Verifying Transformed Employee Records (USN11) – 5

Total Story Points in Sprint 2

$$3 + 3 + 3 + 2 + 3 + 5 = 19$$

Total Story Points in Sprint 2 = 19

Total Story Points

Sprint 1 = 13

Sprint 2 = 19

Velocity

Velocity = Total Story Points Completed / Number of Sprints

$$\text{Total Story Points} = 13 + 19 = 32$$

Number of Sprints = 2

$$\text{Velocity} = 32 / 2$$

Velocity = 16 Story Points per Sprint

Your team's velocity is 16 Story Points per Sprint.
