

Functional & Performance Testing Template

Model Performance Test

Date	01 October 2026
Team ID	SWTID-2026-9203
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Excel File Upload Validation	Upload a valid .xlsx employee spreadsheet and attempt to upload an invalid/unsupported file format.	Valid Excel file is accepted and loaded into the Import Set. Invalid file is rejected or shows an appropriate error.	Valid Excel file was loaded successfully into the Import Set; invalid file was rejected.	Pass

FT-02	Required Field Validation	Upload employee data with required fields such as Employee ID, Name, Email, or Department missing or empty.	Complete records are accepted; missing required values are identified for correction.	Records with required values were processed; missing values were identified during validation.	Pass
FT-03	Import Set Data Loading	Upload the employee spreadsheet and open the Import Set staging table.	Spreadsheet rows are loaded correctly into the Import Set table.	Employee spreadsheet records were loaded into the staging table successfully.	Pass
FT-04	Transform Map Field Mapping	Configure the Transform Map and map spreadsheet source fields to corresponding employee target-table fields.	Each source field is mapped to the correct target field.	Source-to-target field mappings were configured correctly.	Pass
FT-05	Data Transformation	Run the Transform Map after loading valid employee records.	Valid source records are transformed and created/updated in the employee target table.	Employee records were transformed and created/updated successfully.	Pass

FT-06	Transformation Error Handling	Upload records containing invalid or incomplete data and run the transformation.	Invalid records are identified and transformation errors are displayed for correction.	Invalid records were identified during transformation and required correction.	Pass
FT-07	Duplicate Record Validation	Import employee records containing an existing Employee ID or	Duplicate records are prevented or identified according to the configured.	Duplicate handling was verified	Pass
