Define the Problem Statements

Date	01 October 2026
Team ID	SWTID-2026-9203
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	2 Marks

Customer Problem Statement Template:

The following statements use the template structure: I am (customer), I'm trying to, But, Because, Which makes me feel.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an IT administrator responsible for maintaining employee records in ServiceNow	import a large employee spreadsheet into ServiceNow quickly and accurately	manual entry of each employee record takes time and can introduce errors	the spreadsheet contains many structured records that need to be moved into the correct ServiceNow fields	frustrated and concerned about data accuracy and the time required
PS-2	a ServiceNow administrator or implementation trainee	map spreadsheet fields to the appropriate target table and verify the imported records	incorrect or incomplete field mappings can produce inaccurate target records	the data must pass through an Import Set and Transform Map before it reaches the target table	uncertain until the transformation results have been checked

Core Problem Statement:

Employee data received in spreadsheet form needs to be migrated into ServiceNow efficiently and accurately, but manual entry and incorrect field mapping can cause delays and data-quality issues. A structured Import Set and Transform Map workflow is needed to stage, map, transform and verify the data.
